NADH+ and the Essential Nutrient pack- THIS IS ONE OF MY RECOMMENDATIONS!!!!!!

You are a direct reflection of your cellular health. Protect and energize your cells to support their role in healthy aging and your body functioning properly. That's why cell care is the new self-care. IV's last 72 hours, this is effective daily for a fraction of the cost.

- **Energy Production:** Optimizes the production of energy in the cell to support everything your body does (like respiration, digestion, movement, and more).
- **Cellular Detoxification & Protection:** Helps slow cellular aging by boosting your cells' natural detoxification process.
- **Capsule Technology:** Designed with advanced capsule technology, utilizing timed-release beadlets to provide increased absorption and bioavailability.

Typically this has been offered as IV's that requires 4 hours for administration and can run about 500/ session. The results only last about 72 hours.

Isagenix has developed a time release liposomal delivery capsule that elevates NAD levels - these have been shown to allow for more bioavailability

This is 174.00/ month + shipping – Click the following link to Order.

Semorelin injections	2000 mcg/5mg/ (7.5 ml vial)	60 days – \$350.00	Southlake	Ships in 10-14 days

AOD 9604 Peptide

AOD 9604 is marketed as an anti-obesity drug, to trigger areas with abnormally high levels of fat deposits in the body. It has the same benefits as HGH, however, it does not target the blood sugar levels or IGF-1 levels in the same manner. So, individuals who are using this supplement aren't going to feel side effects they might experience if they are using HGH growth hormones to help them achieve their weight loss goals over time.

AOD 9604 works to help regulate the body's metabolism. It will help speed up metabolism, meaning greater fat burning, calorie burning, and greater weight loss results in a shorter period. By destructing fat cells, the body can target revving up the metabolism, and inhibiting lipogenesis.

Individuals are going to realize the greatest results if they are following a lower calorie diet and are exercising. This will help promote greater weight loss results, and it is going to ensure higher caloric burn throughout the day. The regenerative powers of AOD have also been noted to help individuals who suffer from conditions like osteoarthritis and osteoporosis. It can help improve bone strength and help prevent wear and tear on the joints and muscles over time.

Medicine dose	Route	Days supply	Price	Pharmacy	Shipping time
AOD-9604 cream	Transdermal	30	\$175.00	South Lake	3 business days

PEPTIDES

Melanotan II – Sunless tanning \$225.00/ vial

This is a Subcutaneous injection (in the fat layer) daily for 7-14 days (or until desired color is achieved) and then 1-2 times a week for maintenance. One vial will last about 6- 10 weeks.

Melanotan 1 is a peptide derivative of alpha-melanocyte stimulating hormone (a-MSH). It b derivatives of alpha-melanocyte stimulating hormone (a-MSH). Both peptides bind to melanocortin receptors to produce a variety of interesting effects. Of note, both MT1 and MT2 have an impact on melanin expression and thus skin pigmentation. Both also affect sexual arousal, feeding behavior, blood pressure, central nervous system function, and willpower. It binds to melanocortin receptors to produce a variety of interesting effects. Of note, it has an impact on melanin expression and thus skin pigmentation. Both also affect sexual arousal, feeding behavior, blood pressure, central nervous system function, and willpower.

- Skin pigmentation
- Fat burning
- Cognitive function
- Blood pressure
- Vascular health
- Neuroinflammatory disease

HAIR & SKIN CARE PRODUCTS – There are multiple combinations and formulations for  and hair. Schedule a consult to get the best combination for you

Isagenix Collagen – this is the best answer to all skin care issues. See real life patients before and after's [HERE](#)

This is a clean, pregnancy, cancer and non-pharmaceutical option to great skin hair and nails. Here is a video on the information [WATCH HERE](#)

To purchase I recommend a month of 60 doses (twice a day) and then you can continue to remain at twice a day or drop down to 30 - 40/ month.

Botox Cream – 150.00 (30 ml)

GHK-Cu is a naturally occurring tripeptide found in human plasma. It's been established as a powerful protective and regenerative ingredient and is widely used in skin and hair products.

ACA pharmacy offers a smooth, luxurious-feeling GHK-see you cream preparation for your skin care needs.

HOW DOES IT WORK?

GHK-Cu is thought to be released as a result of tissue injury. It has a variety of roles in the human body, including: promoting wound healing, attracting immune cells, antioxidant and anti-inflammatory effects, and promoting blood vessel growth

WHAT ARE THE BENEFITS?

1. Reduces the appearance of fine lines, depth of wrinkles, and improves skin structure.
2. Tightens loose skin and reverses thinning of aged skin.
3. Improves skin firmness, elasticity, and clarity.
4. Soothes rough skin
5. Reduces photodamage, mottled hyperpigmentation, skin spots, and lesions.
6. Repairs protective skin barrier proteins
7. Protect skin from UV radiation
